Microfilm #208459 of the Mormon collection contains marriages from 1785 – 1898. From 1800 on Mennonite marriages are included. The following are the Mennonite extractions done by Adalbert Goertz and published in *Altpreussische Geschlechterkunde* (1982; p. 296). I have translated Adalbert's transcriptions. My comments and additions are in square brackets [] and statements in quotes are taken directly from the microfilm without translation. Unless a person is designated as a widow or widower assume that the person was previously unmarried.
