# Chortitza Mennonite Settlement Census for October 1802 State Archives of Dnipro Region (DADO) <br> Fond 134 Opis 1 Delo 55 <br> Translation by Glenn H. Penner (gpenner@uoguelph.ca) GRANDMA numbers and notes by Richard $D$. Thiessen 

The following is a census for October 1802 of the Chortitza Mennonite Settlement.
All village names as well as first and last names have been standardized for easier searching and sorting. Since the census was recorded by various village officials and the spellings of names changed from year-to-year, as different men took over the role of village secretary, the spellings of names in the original census lists is meaningless from a genealogical perspective.

Landholder numbers indicate the official property number assigned to the property and was not a physical address. The corresponding numbers for landless families are meaningless and sometimes change from one census to the next.

The secretary for Neuendorf noted the dates of birth of children born in 1802, and the secretary for Schoenwiese noted one or more occupations for most heads of households.

Gray highlighted cells indicate that the information was not available in the original or unreadable.

The census was not held on a specific day. Each village conducted the census on a specific day between 1 October and 1 November 1802 . The exception is Schoenwiese, for which an October census cannot be found. Instead a census from the $4^{\text {th }}$ of May is included.

Please note that the surname was not recorded for most children, including a wife's children from a previous husband. Today we would classify these children as step-children of the head of the household, but this was not done in the censuses of this time. It appears that the only time the term stepson or stepdaughter was used is when both of the child's biological parents had passed away, and either the head of the household or his wife were the surviving spouse of one of that child's biological parents. Attempts have been made to sort out the often complex blended families in many households.

In some instances，single men living with families，along with maids，servants，and foster children，were identified by both their given names and their surnames． However，this is not always the case．As a result，many servants，maids，and foster children cannot be identified with GRANDMA numbers because only their first names were given．In some cases，servants and maids were children whose parents were still alive but for economic reasons，the children were employed in another household．In other cases，servants and maids were orphans，or a parent was deceased and the surviving parent had remarried and the blended family was not able to accommodate all of the children．Foster children were usually children whose parents have both died．The death of a parent often resulted in dire consequences for the surviving children，especially if the family was landless．

The second last column contains the number in the GRANDMA database for the household head only or unrelated individuals whose surnames are given in the census．GRANDMA is a reference to the Genealogical Registry and Database of Mennonite Ancestry，version 20－07，published by the California Mennonite Historical Society in July 2020.
Since there is also an April 1802 census（which appears to be incomplete）this census should be referred to as the＂October 1802 Chortitza Colony Census．＂
